

# **Nauru container charging rechargeable batteries**

## Overview

---

Can You ship lithium batteries in an ocean container?

If the vehicle can be handled in a non-upright position, it must be secured in strong, rigid outer packaging. For many carriers, certain lithium batteries are totally off limits. Container shipping giant MSC recently reminded its customers that it won't ship lithium batteries in an ocean container if they've been used or damaged.

Can lithium batteries be shipped?

Not all shipping companies can ship lithium batteries. So first and foremost, when shipping lithium batteries by road, sea, rail or air, you should choose a reputable carrier that has guidelines in place for shipping these items, together with trained personnel who understand how lithium batteries work and how to handle them safely.

Are lithium ion batteries rechargeable?

Lithium-ion batteries are generally rechargeable and found in devices like smartphones, tablets and electric vehicles. Lithium metal batteries are generally non-rechargeable and one-time use, but have a longer life than standard alkaline batteries. They're commonly used in hearing aids, wristwatches, smoke detectors and key fobs.

Are lithium ion batteries safe to ship?

They're commonly used in hearing aids, wristwatches, smoke detectors and key fobs. Both lithium-ion and lithium metal cells and batteries are hazardous to ship, and they're subjected to roughly the same regulatory requirements depending on mode of transport (i.e., ocean vs. air).

Are NiMH batteries exempt from international shipping?

\* NiMH batteries are generally exempt under international law, but always check with your carrier, especially for air shipments. \*\* Damaged or defective

batteries (any type) are always treated as high-risk and require special approvals, packaging, and labeling.
