

# **New high-power outdoor power supply**

## Overview

---

What is the best portable power station?

The Jackery Explorer 1500 Portable Power Station is our recommendation for the overall best portable power station. With a large battery capacity that can power a television for 21 hours and a variety of outlets and ports, it's suitable for home emergencies, camping, and job site use.

Should you buy a portable power station?

The term “portable” is stretching it sometimes. Batteries are heavy. The larger-capacity power stations are typically on wheels and have telescopic handles, and they are still tough to cart around. If you’re looking for something you can actually carry on foot for a distance, you may need to temper your expectations on capacity.

Should you buy a power brick or a portable power station?

Small power bricks have enough juice to charge your phone a few times, while a cooler-sized portable power station can keep vital electronics running during a power outage or camping trip, and the most powerful options will provide electricity to your entire house.

Can you take a portable power station camping?

You can take any good portable power station camping and get good use out of it, as long as you don't mind closely monitoring your power usage. The difference with the Jackery Solar Generator 1000 is that it comes with two of Jackery's powerful SolarSaga 100X solar panels that can charge the battery in about eight hours.

Is zendure a good power supply?

Zendure also offers semi-solid-state batteries in its top-of-the-line SuperBase listed above, which it promises are more stable and resilient, therefore safer, and have a higher energy density. Some power stations can act as an

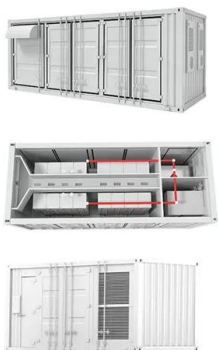

uninterruptible power supply (UPS); others are classed as an emergency power supply (EPS).
