## Overview

---

Why are Nordic solar panels better than standard solar panels?

Because they are more efficient than standard glass solar panels you'll get higher production from a relatively small size. Together with the minimum thickness of only 3mm they are ideal for use on campers, caravans, or other recreational vehicles. The Nordic series is fitted with a smooth surface and is not designed to be walked upon intensively.

Is Nordic solar integrating battery storage into a solar park project?

Operating in 12 European countries, the solar energy company Nordic Solar is investing heavily in integrating battery storage into its portfolio of solar park projects and is now launching the construction of its first project, which is located in Denmark.

What is the Nordic series?

The Nordic series has been developed by SUNBEAMsystem for use in its region of origin: the northern latitudes. It offers a universal solution for applications with a requirement for lightweight, flexible and compact solar panels.

Why should I join Nordic solar?

Joining Nordic Solar means building a career with exciting opportunities. You will find a space to grow, learn and engage in a collaborative environment. Battery Energy Storage Systems (BESS) are the perfect complement to solar energy, which is one of the most predictable and cost-efficient renewable energy sources available.

What is Nordic energigrossisten 550wp size?

Nordic energigrossisten 550wp size 2279x1134x35mm 25 years product and 30 years production warranty 158.75-cell monocrystalline solar module in half-cell architecture. This monocrystalline solar module with 158.75 cells, in half-cell architecture, convinces with its very high wattage, is ideal for usage in

commercial and large-scale plants.

What's new in the Nordic models?

All Nordic models have been upgraded with newer and more efficient solar cells, increasing the peak power output. The Flush models are shipped without stainless steel eyes allowing for seamless integration on hard surfaces.
