

# **Outdoor backup power supply with built-in inverter**

## Overview

---

What is a battery backup & power inverter system?

A battery backup & power inverter system includes aftermarket uninterrupted power supplies (UPS) for use with existing 110V or 230V gate operators. These systems often come with a switching circuit, a small DC powered backup motor, and the battery backup unit itself.

Where can backup power systems with inverters be installed?

Backup power systems using inverters can be installed in homes, offices, and small businesses to maintain essential services during load shedding events or power outages.

What is a weatherproof UPS backup system?

Weatherproof UPS backup systems for emergency backup power. Our AC/DC Outdoor UPS™ back-up systems provide a complete, uninterruptible power supply that integrates quickly with batteries, loads, and monitors. DC systems are available in 12, 24 and 48 volt. AC systems are available in 120 VAC configurations.

What is ups-AC/DC outdoor?

Our systems produce clean, uninterrupted power for critical AC and/or DC loads. In the event of AC (utility) power loss, the UPS-AC/DC Outdoor supplies back-up power for 24-48 hours, or longer if requested. We include a high quality, powder-coated, outdoor rated white aluminum enclosure, designed to house the battery and system electronics.

What is a DC to AC inverter?

AC systems feature an industrial quality pure-sine DC to AC inverter for AC loads. These components are all housed in a rugged outdoor-rated NEMA enclosure. Versatile installation options include wall mount, 19" rackmount and DIN-Rail.
