

# Outdoor power supply independently developed battery cells

- ✓ 100KW/174KWh
- ✓ Parallel up-to 3sets
- ✓ IP Grade 54
- ✓ EMS AND BMS

## Overview

---

What is the battery capacity of outdoor power supply?

At present, the battery capacity of outdoor power supply in the domestic market varies from 100Wh to 2400Wh. 1000 Wh = 1 Kwh. The maximum capacity we've seen is 2400Wh, which means it has 2.4 -kilowatt storage. For high-power equipment, the battery capacity determines the battery life and how long it can be charged.

Why should you choose a small cell power system?

When small cells are used to expand coverage, our battery backup solutions keep your network online. And our outdoor power cabinets are designed to be low profile, with the ability to add batteries when needed. These total solutions can convert a utility grid connection into an affordable, aesthetically pleasing small cell power system.

Which lithium battery is best for energy storage system?

LICITTI SLIM LITHIUM BATTERIES are available with 120Ah, 150Ah, 200Ah & 300Ah for energy storage systems. The series of LiFePO4 battery are made with advance LiFePO4 battery cells, ensuring high levels of quality and performance. The latest 51.2V rack mount LiFePO4 storage batteries are designed for hybrid power system .

What are outdoor small cells used for?

Outdoor small cells are used to provide network densification, which means adding more cell sites to increase network capacity, as well as coverage in areas not reached effectively by macro cells. EnerSys® is powering 5G networks.

Are battery storage systems a good alternative to diesel and CHP?

While renewable power generators are often the lowest-cost alternative to diesel and CHP plants, they do have one major disadvantage: if there is no

wind, or during darkness, wind power and solar generators are unable to provide electricity. This is where battery storage systems offer a simple solution.

Can a pwrcell Battery Cabinet be connected to a single inverter?

If more power is needed, we've got you covered; multiple PWRcell battery cabinets can be connected to a single PWRcell inverter for up to 36kWh of storage capacity and 11.5 kW continuous backup power. With the optional PWRview app, easily keep tabs on your energy consumption, monitor your battery usage, and track your savings!
