

Photovoltaic module monocrystalline silicon type 620wp double-sided

Overview

What is Topcon 620wp solar module?

We can supply according to your requirements, your email will be replied within 24 hours. Solar Module TOPCon 620Wp is a solar module with high returns thanks to its bifacial module-backside power gain, high energy yield and low BOS. Commercial, Industrial. Low open-circuit voltage and high current design effectively reduces system BOS by 3%.

What is a 620w bifacial solar panel?

Discover the JA Solar Deep blue4 n-type 620W Bifacial Solar Panel JAM78D40-620/MB, a cutting-edge solar panel that harnesses sunlight from both sides, offering increased energy yield and enhanced durability.

How much power does a monocrystalline solar panel produce?

With its high efficiency and durability, this monocrystalline silicon panel delivers power output up to 620W. Its bifacial design captures sunlight from both sides, maximizing energy production. With double glass for added durability, it's a reliable choice for solar energy solutions.

Which bifacial double glass module produces more energy?

The bifacial double glass module produces more energy. Our N-type models have superior bifaciality. This means that the rear side of the module can produce up to 85% of the energy generated by the front side. Thus, the panel generates more energy overall. Lower degradation means a higher return on investment.

Photovoltaic module monocrystalline silicon type 620wp double-sided

Silk Nova Duetto

The new n-type Silk® Nova Duetto high efficiency glass/glass double-sided panel with 156 half-cut cells, with a power range from 615 to 625 Watts, completes the FuturaSun model range.
