Where are origami solar patented steel frames made?

Origami Solar's manufacturing partners will produce Origami Solar patented steel frames from multiple locations across the United States offering redundancy, reliability, and optimal logistics. Manufacturing is ready to scale in the US and Europe and can be adapted for other regions.

Why should you choose a metal structure for solar panels?

As solar panels are becoming more and more popular around the world, more and more businesses are looking to take advantage of them. The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured with high precision, the assembly becomes easy and fast.

Why should you use Nucor powershingle solar roof panels?

And when combined with Nucor PowerShingle solar roof panels, you can now ensure the space beneath your solar structures remains dry. Businesses across the country are taking advantage of the power the sun offers and installing solar parking lots.

Why do car parks have photovoltaic panels?

Increasing electricity consumption and the need to reduce CO2 emissions are the main reasons why car parks equipped with photovoltaic panels are increasingly favored in cities that want to be as green as possible.
