

Photovoltaic panels for Polish homes

Overview

Why should you invest in photovoltaic panels in Poland?

Photovoltaics, like heat pumps, have become one of the fastest-growing energy sectors in Poland. Investing in photovoltaic panels is not only a way to save money but also to increase independence from rising electricity prices. By generating electricity from renewable energy sources, you can protect the environment while reducing your bills.

Are bespoke solar power systems a good option for homeowners in Poland?

Bespoke solar power systems are great for homeowners in Poland. They offer many advantages over traditional energy sources. Our solutions are designed just for you, making them the perfect way to go green. Reduced reliance on traditional energy sources: These solar systems use the sun to lower your fossil fuel use.

Who can apply for a photovoltaic installation in Poland?

The program is dedicated to households in Poland. Only domestic persons generating electricity for their own needs can become beneficiaries. You can apply for the program even if you purchased the installation after February 1, 2020. This means that you can qualify for the costs already incurred for a photovoltaic installation.

When can I use the photovoltaic discount system in Poland?

Owners of photovoltaic installations installed in Poland before March 31, 2022, can still benefit from the previous discount system. Those who installed panels after this date could use the old system until July 1, 2024.

Where can I buy photovoltaic panels?

The photovoltaic wholesaler Solmix offers the highest quality photovoltaic panels from reliable manufacturers at the lowest prices. In the online store you can order modules by the piece, as well as in pallet quantities. For

photovoltaic installers we have also prepared a special container price offer for the purchase of photovoltaic modules.

How much energy does a Polish House use per month?

Let's assume on average the annual energy demand of a house in the range of 4000 kWh (~330 kWh per month). We are talking about statistical consumption in a Polish home, where the use of an induction kitchen is used instead of a gas one and where a TV is quite often on.
