

Photovoltaic panels installed on Mauritius rooftop BESS

Overview

Who is Solar Center Mauritius?

SOLAR CENTER MAURITIUS is the only expert in photovoltaic solar energy in Mauritius for over 15 years.) We are more specialized in rooftop solar installations: houses, offices, commercial buildings, agricultural buildings, warehouses, . All our design office engineers and site managers have been trained in France with the QUALI PV. distinction.

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

Does Qair Group operate solar energy farms in Mauritius?

Qair Group already operates three solar PV and wind energy farms in Mauritius with a combined capacity of 35 MW. The group founded by Jean-Marc Bouchet has a combined renewable energy capacity of 860 MW operational in Africa, South-East Asia, South America, and Europe.

Where are the BESS installations located?

The CEB has two BESS installations located at Amaury Substation and Henrietta Substation. Each BESS is made up of two containers of 20ft housing 10 racks of Lithium Ion batteries for a total energy storage of 1.12 MWh and two power converters with a total installed capacity of 2.24 MW respectively.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

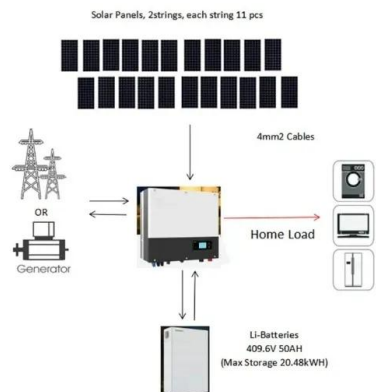

How many BESS installations does the CEB have?

The CEB has two BESS installations of 2 MW power output each. One is installed at Amaury Substation and the other at Henrietta Substation.
