

Poland PV inverter subsidies

Overview

Beneficiaries receive a non-refundable subsidy covering up to 50% of eligible investment costs, up to PLN 5 000 (EUR 1 100). The subsidy can be used to pay for devices such as PV panels and inverters, cables, as well as for solar panel installation. What are the requirements for a photovoltaic system in Poland?

6□ Balcony PV sets. 7□ Other devices approved for use in Poland. All photovoltaic installations must be connected to the national power grid. The capacity of the energy storage systems funded under the program must be at least 1.5 times the peak power (kWp) of the PV installation.

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.

Are prosumers eligible for a solar subsidy?

Net-billing prosumers who incurred installation expenses after Jan 1, 2021, are eligible. The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage.

How much money does a new climate plan cost in Poland?

The budget for the latest edition of the scheme totals PLN 400 million, with financing coming from the European Funds for Infrastructure, Climate, Environment program. Applications will be accepted until Dec. 20, or when funds are exhausted. Additional details are available on the Polish government's website.
