

# **Portugal s BESS rooftop photovoltaic panels**

## Overview

---

The is an 11 megawatt plant covered 150 acres (0.61 km ) and employs 52,000 PV panels. The panels are raised 2 meters off the ground thus allowing grazing to continue. The plant provides enough energy for 8,000 homes and saves an estimated 30,000 tonnes of per year.

Is Portugal a good country to install solar panels?

Portugal enjoys over 300 sunny days annually, making it one of the most solar-rich countries in Europe. According to data from the International Energy Agency (IEA), the country's annual solar irradiation ranges between 1,600 and 2,200 kWh/m<sup>2</sup>, making it ideal for photovoltaic (PV) installations.

Does Portugal have a solar potential?

While Portugal's revised National Energy and Climate Plan (NECP) and Long-Term Strategy for Carbon Neutrality (LTS) have raised targets for decentralised solar photovoltaic (PV) capacity, they remain below the country's solar potential.

Why is Portugal investing in solar battery storage?

Portugal is actively expanding its investment in solar battery storage, ensuring that homeowners will soon have more efficient ways to store and use their solar energy. Those who install solar panels today will be well-positioned to take advantage of these advancements in the near future. Learn about solar batteries in Algarve.

Why should you invest in solar energy in Portugal?

Portugal's solar energy sector is a beacon for renewable energy development, offering abundant opportunities for professionals and investors. The combination of high solar potential, supportive policies, and technological advancements positions the country as a leader in the global solar market.

Why is Portugal a leader in solar energy adoption?

Portugal has emerged as a global leader in solar energy adoption, thanks to

its favorable climate, ambitious renewable energy targets, and robust policy frameworks. This page provides detailed insights into the solar landscape of Portugal, offering valuable information for professionals and enthusiasts in the renewable energy sector.

What is the VAT rate for solar panels in Portugal?

Until 30 June 2025, installations benefit from a reduced VAT rate of 6% on mainland Portugal (5% in Madeira, 4% in the Azores). After that, the rate is expected to return to the standard 23%. Thinking about installing solar panels in your Portuguese home?
