

Power supply station serves energy storage project enterprises

Overview

What are battery storage power stations?

Battery storage power stations are usually composed of batteries, power conversion systems (inverters), control systems and monitoring equipment. There are a variety of battery types used, including lithium-ion, lead-acid, flow cell batteries, and others, depending on factors such as energy density, cycle life, and cost.

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

What is the construction process of energy storage power stations?

The construction process of energy storage power stations involves multiple key stages, each of which requires careful planning and execution to ensure smooth implementation.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.

Why do battery storage power stations need a data collection system?

Battery storage power stations require complete functions to ensure efficient operation and management. First, they need strong data collection capabilities to collect important information such as voltage, current, temperature, SOC, etc.

What is a battery energy storage system design plan?

Detailed battery energy storage system design plans were developed based on site surveys, geological assessments and technical specifications. This includes producing construction blueprints, drafting drawings from various disciplines (structural, civil engineering, electrical, etc.), and signing technical agreements with equipment manufacturers.
