

Price of 10KW photovoltaic panels for home use

Overview

A 10 kW solar panel system is enough to power some homes—but it'll cost you about \$25,400. Why trust EnergySage?

If you've been considering solar, you're probably curious about costs —and maybe a little envious of neighbors who've already made the switch and are enjoying lower electric bills. How much does a 10 kW solar panel cost?

On average, a 10 kW solar panel system costs \$25,400, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 10 kW solar panel system in your state.

How much does a 10kW solar kit cost?

Buy the lowest cost 10kW solar kit priced from \$1.15 to \$2.10 per watt with the latest, most powerful solar panels, module optimizers, or micro-inverters. For home or business, save 26% with a solar tax credit. Click on a solar kit below to review parts list and options for battery storage, EV charging and installation.

Where can I buy a 10 kW solar system?

Featuring daily updates with the lowest prices on solar panels, SunWatts has a big selection of affordable 10 kW PV systems for sale. These 10 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions.

How many solar panels does a 10kW Solar System have?

The average 10kW solar system has around 40 solar panels installed. But the number of panels can range from 30 to 60, depending on the size and power of the panels. A 10kW system is a pretty big system, and it'll usually take up around 400 square feet of space.

How much does an off grid 10kW Solar System cost?

The average cost of an off grid 10kW solar system is \$19,000. This price includes the cost of installation and the panels themselves. However, it does not include the cost of batteries, which can range from \$2,000 to \$10,000 depending on the type and size of battery you choose.

How much electricity does a 10 kW solar system produce?

Depending on where you live, you can expect the system to produce between 11,000 and 15,000 kWh of electricity every year! You need about 25 average-sized solar panels and 440 square feet of roof space for a 10 kW solar installation. Read on to find out more about 10 kW solar panel systems and if it's the right size for you!
