

Recommended manufacturers of energy storage lithium batteries in Argentina

Overview

Who is Argentina Lithium & Energy Corp?

Learn more Welcome to Argentina Lithium & Energy Corp. Argentina Lithium & Energy Corp is focused on acquiring high quality lithium projects in Argentina and advancing them towards production in order to meet the growing global demand from the battery sector.

Is Arcadium lithium still produced in Argentina?

Arcadium Lithium, the firm that resulted from the merger between Livent and Allkem, two of the three companies that were already producing lithium in Argentina, accounts for 13% of global production. Output has quadrupled in the last ten years, but is still attributable to only a few countries and projects. Another Argentine Unicorn on the Horizon?

.

Which Argentine sites produce lithium hydroxide and lithium carbonate?

Two Argentine sites, Salar de Hombre de Muerto and Salar Cauchari - Olaroz, are already producing lithium hydroxide and lithium carbonate, and are among the top three with the highest lithium concentration in the region, behind Salar de Atacama in Chile. They are also among the top three with the lowest impurities.

Why should you invest in Argentina lithium?

Argentina Lithium's believes it is the responsibility of the mining industry to mitigate the impacts of resource exploration on the planet. Learn how we are building value for investors by capitalizing on our expertise and success in exploring for metals and alternative fuel materials in Argentina.

Where are lithium companies based?

Furthermore, there are also national oil companies that have ventured into

local lithium in recent years (Pluspetrol, Integra, PAE, Tecpetrol). These companies have headquarters in several countries, including Australia, Canada, South Korea, China, the United States, France, among others.

How much lithium does a car use?

Regarding the use of this key resource for the energy transition, the report details that lithium constitutes between 7% and 10% of each battery. On average, a vehicle uses 55 kilograms of lithium carbonate for its battery cathode, equivalent to what 17,000 cell phones require. How is lithium produced in Argentina?
