

# **Slovenia Vanua Solar Power System**

## Overview

---

How much solar power does Slovenia have in 2023?

In 2023 Slovenia added 400 MW in solar power, exceeding 1 GW in total capacity. The country also entered the list of the top ten European Union member countries in installed solar power per capita.

How many photovoltaic power plants are there in Slovenia?

The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW. Parliament and Government are in the process of adopting or have already adopted several amendments to the energy legislation related to renewable energy.

Does Slovenia have solar power?

Per analysis published by the World Bank which considers natural features of a location such as altitude, humidity, cloud cover, and topography, Slovenia's solar PV potential is relatively low compared to global resources, but is comparable to that of other central and eastern European countries which lie north of the Alps.
