

# **Snowblower Emergency Communication Command Base Station**

## Overview

---

What is a two-way emergency communication system?

The Command Center Two-Way Emergency Communication System is designed to provide efficient two-way, person-to-person voice communication for Area of Refuge, accommodating an impressive range of 1 to 116 Call Boxes. Utilizing a home run configuration with only one pair of wires needed between each Call Box and the head end.

Are call boxes a code-compliant emergency communication system?

Each Area of Refuge requires hands-free, two-way emergency communication devices (Call Boxes) on each floor above/below the main exit floor. A code-compliant two-way communication system for rescue assistance requires a central control point to manage emergency assistance calls from call boxes.

Do elevators need a two-way emergency communication system?

A two-way emergency communication system for rescue assistance is required, by industry standards NFPA, IBC and ADA, at each elevator or bank of elevators, on each accessible floor above/below exit discharge, so trapped parties can call for rescue assistance.

What is NFPA 72 level 1 emergency communication system?

NFPA 72 2016 Section 24.3.13.9.1 stated " Area of Refuge emergency communication systems shall have a pathway survivability of level 2 or level 3. " Level 1 is permitted when the building is less than 2-hour fire rated construction. Shall be tested at Initial Acceptance and annually thereafter.
