

# **Solar Mobile Nighttime On-Site Energy Prices**

**5 Years  
warranty**

## Overview

---

What is a mobile solar tower?

The mobile solar tower is powered by the sun, meaning complete silence and no vibrations. Greenshine batteries should be replaced every 5-7 years, keeping maintenance costs low. Designed as a non-diesel light tower alternative, our systems deliver powerful illumination without the fuel cost, engine noise, or emissions.

What are greenshine mobile solar light towers?

Greenshine mobile solar light towers extend up to 20 feet and retract to 6'3", lighting up large areas while requiring no connection to the power grid. These towers include different operating modes like "Dusk 'til Dawn" and other custom settings accessible through the Greenshine Connect App.

What are the benefits of a solar battery storage system?

**Self-Consumption:** If you have solar panels, a battery storage system can store excess solar energy generated during the day for use at night or during peak demand periods. **Reduced Carbon Footprint:** Using off-peak electricity, which often comes from cleaner, more efficient power plants operating at lower demand, can reduce your carbon footprint.

Can a home battery be stored without solar?

Home battery storage without solar saves customers up to £1500 per year as your home battery will manipulate smart tariffs to charge when energy is cheapest and greenest, the battery will discharge when energy costs are high, running your home on low-cost, low-carbon battery power at all times.

## Solar Mobile Nighttime On-Site Energy Prices

---

### Mobile Off-Grid Solar Solutions , National Solar Technologies

When you need maximum visibility without the noise and fuel costs of traditional diesel towers, our solar electric light towers deliver powerful LED illumination that runs all night on stored solar ...
