

# Solar cell prices in Norway

## Overview

---

The average market price of such panels ranges from NOK 40,000 to NOK 130,000 for a single-family house and also depends on the location in the country. For a smaller solar cell system intended for summer cottages (Hytt in Norwegian), the cost will be between NOK 40,000 and NOK 100,000. Can you collect solar energy in Norway?

For example, the collection of solar energy was once regarded as gratuitous – especially in parts of the country that had a surplus of energy. Most homes in Norway are now equipped with smart meters allowing you to harvest solar energy, store it, and even sell it back to energy companies.

Is Norway a good place to buy solar cells?

This passion for nature has made Norway one of the most attractive markets for solar cells. Although some of the appeal of cabin life is to take a time-out from technology, electricity is still needed to power lamps, radios and, now, mobile phone chargers.

How to find the best solar panel installers in Norway?

Check possible solutions with [localmarket.no](https://localmarket.no). Compare prices from local certified solar panel installers in Norway. We find the best and cheapest qualified installer in your area, while offering the best solar warranty on the market and the best deals with the highest quality. Switch to GREEN ENERGY with the best warranty on the market.

Why is Norway a good choice for solar energy solutions?

This has led to Norway to become an expert in devising solar energy solutions for out of the way places. Safedesign has designed a rooftop safety system that eliminates the need for scaffolding and makes solar panels more affordable. Industry was also bitten by the solar energy bug.

Are Norwegian solar panels eco-friendly?

The ecological footprint of solar panels made with materials from Norway is therefore extremely small. REC Solar's factory in Fiskå in southwestern Norway has even been awarded a certificate for production of the world's cleanest silicon. Not only is Norwegian silicon production the world's cleanest, it is also the world's most energy efficient.

Why are solar cells so popular in Norway?

Norwegians love to be outdoors. They flock to their cabins in the mountains, in the woods or by the shore to spend their weekends or holidays in beautiful, peaceful surroundings. This passion for nature has made Norway one of the most attractive markets for solar cells.
