

Solar panel price increase

Overview

From April's low to the Q2 high in June 2024, the median U.S. module price rose from \$0.25 cents per watt to \$0.275 cents per watt, marking a 10% increase. Will solar panels cost more than a week ago?

A price increase is still coming, although likely moderated from where it was standing a week ago. Most solar panels will likely see a cost increase of 3 to 4 cents/watt and increased balance of system costs contributing another 2 to 3 cents/watt.

Why are solar panels so expensive in 2021 & 2022?

Solar prices remained significantly high in 2021 and 2022 due to the high cost of polysilicon, which is a key material used in most panels. At the end of last year, several new factories that produce polysilicon came online, contributing to a price drop for material used in panels.

Why are solar panel prices falling?

According to Bloomberg, global solar panel prices are due to come down, the result of prices for the material used to make panels falling. Solar prices remained significantly high in 2021 and 2022 due to the high cost of polysilicon, which is a key material used in most panels.

How much does a solar panel cost?

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar panel also depends on how you buy it.

Are US solar panels at risk from China's tariffs?

US-manufactured solar panels, which use upstream material from China, might see the largest cost increases given the steeper duty rates and a lack of

supply chain outside of China. Battery Energy Storage Systems (BESS) are at even higher risk of substantial price increases due to tariffs, given China's control over the BESS supply chain.

Do solar panels increase home values?

Solar panels increase home values in most places. According to Zillow, no metropolitan area saw home values drop due to solar panels. Solar panels are becoming the most common way to modernize a home.
