

# **Solar panel warranty period**

## Overview

---

Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often guarantees at least 90% production at 10 years and 80% at 25 years. How long does a solar panel warranty last?

The length of a product warranty varies based on the manufacturer and model. Traditionally, these warranties typically last 10-15 years, although it is becoming more common for premium panels to have 20 and 25 year product warranties. If a panel fails within the warranty period, the manufacturer will typically replace or refund the panel.

What is a solar product warranty?

Critically, solar product warranties cover manufacturing defects rather than any issues that arise during or after your installation. For a product warranty to remain valid, a certified solar professional may need to handle, install, and maintain your solar panels, inverters, or batteries. 2. Performance warranties.

Do solar panels have a performance warranty?

A performance warranty, on the other hand, guarantees that your solar panels will produce a certain amount of electricity over their lifespan. Most performance warranties promise that panels will operate at 90% capacity for the first 10 years, then 80% for the remaining 15-20 years.

What warranties does a solar system have?

Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1. Product warranties A solar product warranty covers the physical components of your system, such as the panels, inverters, or batteries.

What are the different types of solar panels warranties?

There are a few different types of warranties you'll come across when

shopping for solar panels: Product Warranty: This covers defects in the materials and workmanship of the panels themselves. Performance Warranty: This guarantees that your panels will produce a certain amount of electricity over their lifespan.

Does a solar panel warranty cover labor costs?

Solar panel warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment. Comparisons should focus on product warranty terms, power guarantees, labor warranty terms, transferability and bankability, and the availability of an extended warranty.
