

# **Solar photovoltaic panel monitoring**

## Overview

---

Solar monitoring systems provide a real-time snapshot of solar energy production data from your home solar system. A good monitoring system can tell you when one or more panels (aka “modules”) isn’t producing as much energy as others, or whether there’s some sort of electrical fault causing you to miss out on.

There are three main types of solar monitoring systems: 1. Solar monitoring from equipment manufacturers 2. Solar monitoring from your.

No matter what solution you choose, solar monitoring has two basic functions: making sure your system is producing solar power and comparing that production over time to what you.
