

South Africa lithium battery energy storage project

Overview

What is the largest battery energy storage system in Africa?

Leading African independent power producer Globeleq says the 153 MW/612 MWh Red Sands project, which was recently awarded preferred bidder status under South Africa 's inaugural battery storage public procurement round, will be the largest standalone battery energy storage system (BESS) in Africa and will carry an investment value of R5.7-billion.

Is Eskom launching a battery energy storage system in South Africa?

Friday, 10 November 2023: Eskom unveiled the first of its kind largest Battery Energy Storage System (BESS) project not only in South Africa but in the African continent. Eskom officially opened the Hex BESS site at Worcester in the Western Cape yesterday.

Where will the battery energy storage project be implemented?

The Project will be implemented at approximately 17 sites, located within or adjacent to existing distribution substations of Eskom, across four provinces of South Africa. The Battery Energy Storage Project (Project) provides a solution to address both challenges.

Is South Africa ready for battery storage?

The South African government has acknowledged the potential of battery storage and has set ambitious targets for its deployment. The 2019 Integrated Resource Plan (IRP) and Eskom's Transmission Development Plan (TDP) project a need for 2GW to 6.6GW of battery storage capacity to be installed by 2032.

How can South Africa develop a sustainable and competitive battery storage industry?

Addressing this gap is crucial for the development of a sustainable and competitive domestic industry. Competition: The global battery storage

industry is already dominated by established players, particularly in Asian countries. South Africa needs to develop a strong value proposition to attract investments and compete effectively.

How much energy storage capacity does South Africa have?

South Africa had 1,604.6kW of capacity in 2022 and this is expected to rise to 3,519.9kW by 2030. Listed below are the five largest energy storage projects by capacity in South Africa, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.
