

Sri Lanka single glass photovoltaic module solar panels

Overview

How does a solar system work in Sri Lanka?

Solar Panels: These are the most visible components of a solar system. Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity.

Are residential solar systems a viable solution in Sri Lanka?

As energy costs continue to rise and concerns about environmental sustainability grow, many homeowners in Sri Lanka consider residential solar systems as a viable solution. A well-designed solar power system can significantly reduce electricity bills, contribute to environmental sustainability, and even provide a backup power source during outages.

Where to buy solar inverter in Sri Lanka?

I usually recommend the companies to buy solar materials from Gunda power. Because all the materials are available. It is the best place to purchase solis inverter as the customer service is excellent and satisfactory. I think the most trusted solar equipment and accessories suppliers in Sri Lanka. They offer wide range of solar powers.

How long does a solar installation last in Sri Lanka?

The payback period for industrial solar installations in Sri Lanka typically ranges from 3 to 4 years. Efficient project designs and use of high-quality components contribute to favorable ROI. The upfront costs for a factory-sized solar installation can be significant.

Are solar panels tax deductible in Sri Lanka?

Government Incentives: Although there are no specific subsidies for solar systems in Sri Lanka, homeowners can deduct a portion of installation costs

from their taxable income—the solar industry benefits from tariffs supporting energy adoption.

Should a factory use solar panels?

For factories with high energy consumption, is typically the best option as it allows for offsetting energy usage with the electricity generated by their solar panels. might benefit warehouses with lower energy consumption since excess energy is sold back to the grid.
