

# **Tens of billions of funds invested in wind solar and storage industries**

## Overview

---

How much money does the US invest in energy technology?

Investment in deploying technology to decarbonize energy and industrial production in the US totals \$172 billion over the past two years, up by 42% compared to \$121 billion during the prior two years. Energy technologies accounted for more than three-quarters of this investment, with utility-scale solar and storage as the top two at \$135 billion.

How much energy is invested in wind & solar PV in 2023?

In 2023, each dollar invested in wind and solar PV yielded 2.5 times more energy output than a dollar spent on the same technologies a decade prior. In 2015, the ratio of clean power to unabated fossil fuel power investments was roughly 2:1. In 2024, this ratio is set to reach 10:1.

How much money has been invested in energy transition technologies in 2023?

Madrid, Spain, 22 February 2023 – The report Global Landscape of Renewable Energy Finance 2023 reveals that global investment in energy transition technologies last year—including energy efficiency—reached USD 1.3 trillion. It set a new record-high, up 19% from 2021 investment levels, and 70% from before the pandemic in 2019.

How much money was invested in energy in 2022?

Investment in the energy transition amounted to 1.1 trillion U.S. dollars in 2022, surpassing the investment in fossil fuels for the first time. Renewable energy technologies accounted for nearly half of that amount, reaching almost 500 billion U.S. dollars in 2022.

What are the different types of renewable investment data?

The renewable investment data, which include asset finance and small-scale solar, cover geothermal, waste-to-energy, tidal energy, solar, biofuel projects

bigger than a million liters a year, wind generation projects bigger than 1 megawatt and hydropower between 1 MW and 50 MW. Data are updated quarterly.

How much money did US businesses invest in ZEVs in the past year?

American businesses and households invested \$97 billion in ZEVs in the past year, a 12% increase from the previous year. Purchase and installations of residential and commercial rooftop solar systems, other distributed renewables, fuel cells and battery storage totaled \$18 billion, roughly flat year-on-year.
