

The company with the largest export of photovoltaic modules

LFP 48V 100Ah

Overview

Who will dominate the global PV module market in 2023?

A total of 18 Chinese companies were selected in the top 20 list, with a total output of more than 440GW in 2023, gradually taking over the global PV module market with their unique advantages. LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year.

What are the key characteristics of global PV module manufacturers?

This report, drawing on the latest developments in the 2025 market, analyzes the key characteristics of the top 10 global PV module manufacturers across four dimensions: technological capability, vertical integration, international presence, and performance in the European market.

What is the future of photovoltaics in Europe?

Against the backdrop of an accelerating global energy transition, the total installed photovoltaic capacity worldwide is expected to exceed 1,200 GW by 2025. The commercial and industrial (C&I) market in Europe is expanding in parallel, with solar PV becoming a key tool for businesses to manage energy consumption and drive green transformation.
