

# **The cost of installing solar panels and photovoltaic panels in factories**

## Overview

---

How much does a solar panel installation cost?

Solar panel installation costs vary by the installation company and project scope, making it challenging to pinpoint exactly how much you'll pay to have a pro install your solar panels. However, the U.S. Department of Energy estimates that installers add around \$2.25 per watt to the cost of a solar panel installation.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does a commercial solar system cost?

The average commercial solar panel system will cost between \$1 and \$2.50 per watt. Businesses should expect to pay between \$125,000 and \$500,000+ before any tax incentives or grants are utilized. This cost will vary significantly depending on the system size, installation type, and various other factors we have covered above.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does it cost to install solar panels in Texas?

As of 2024, the average cost of installing 11 kW of solar panels in Texas was \$29,589, and the national average was \$29,926. It's worth noting that these

are the total costs before any federal tax credits (see the .gov eligibility breakdown), utility provider incentives (see our SolarSPARC® incentive rebate), or buyback programs are deducted.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.
