

Tunisia 1KW solar integrated machine

Overview

What is the productivity of photovoltaic systems in Tunisia?

Given these favourable conditions, the productivity of photovoltaic systems in Tunisia is very high. According to the International Renewable Energy Agency's (IRENA) Global Atlas, annual electricity production from PV systems ranges from 1,450 kWh per kilowatt peak (kWp) in the northwest to 1,830 kWh/kWp in the extreme southeast.

How much solar radiation does Tunisia have?

Solar radiation varies from 1,800 kilowatt hours (kWh)/m²/year in the north to 2,600 kWh/m²/year in the south. The average total horizontal irradiation ranges from 4.2 kWh/m²/day in the northwest of Tunisia to 5.8 kWh/m²/day in the extreme south. Given these favourable conditions, the productivity of photovoltaic systems in Tunisia is very high.

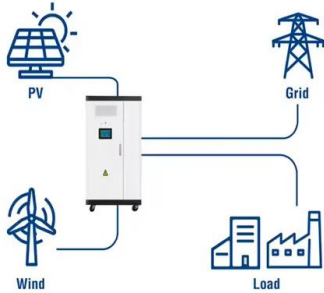

How is Tunisia accelerating its energy transition?

Tunisia is accelerating its energy transition by awarding 4 solar photovoltaic projects totaling 498 MW to reduce import dependency and promote renewable energy. Faced with growing energy dependency, Tunisia is taking a decisive step forward in its commitment to renewable energy.
