

Turkish lithium power energy storage company

Overview

What is Turkey's first lithium phosphate battery factory?

According to rules that came into force in October, such systems must have maximum operating power of at least 2 MW. Also this week, Kontrolmatik broke ground in Ankara for Turkey's first lithium iron phosphate battery factory. Minister of Industry and Technology Mustafa Varank said the project is worth USD 180 million.

Who is Turkey's energy storage leader?

Shaping the Future of Energy Storage - Meet Turkey's Energy Storage Leader: Pomega! The company has meticulously designed its production processes to minimize environmental impact, adhering to the highest eco-efficiency standards.

Is kontrolmatik building a lithium iron phosphate battery plant?

Its parent Kontrolmatik has just started the construction of a lithium iron phosphate battery plant. The Energy Market Regulatory Authority (EMRA) received the first application for the installation and operation of an independent electricity storage unit in the form of batteries, Anadolu reported.

Why do we need a battery unit in Turkey?

They are convenient for immediate deployment in cases of demand spikes, drops in production and supply outages. The facility in Silivri would be the first detached battery unit in Turkey, as all other units and projects are integrated with power plants.
