

Ukrainian multifunctional energy storage power supply sales

Overview

How important are energy storage systems in Ukraine?

"In the context of large-scale attacks on Ukraine's energy system, the role of energy storage systems has become just as fundamental as energy generation itself," said energy minister Svitlana Grinchuk. (\$1 = 0.8554 euros).

Why is DTEK launching a battery storage facility in Ukraine?

REUTERS/Valentyn Ogirenko/File photo Purchase Licensing Rights KYIV, Sept 11 (Reuters) - Ukrainian private energy firm DTEK has launched the country's largest battery storage facility to ensure stable power supplies in the face of Russian attacks on Ukraine's energy sector, the company said on Thursday.

What is the energy supply of Ukraine?

Ukraine's total primary energy supply in 2017 was 89.6 mtoe, with the largest shares coming from coal (29%) and natural gas (27%). Ukraine produces about two-thirds of its energy supply domestically but continues to import coal, natural gas, and crude oil and oil products to meet its domestic demand.

How will DTEK's new power systems affect the power supply?

DTEK said the new systems would increase the security of the electricity supply and reduce the risk of outages and accidents, especially in the event of a breakdown in some power generation.
