

Use 12 volt 12 amp inverter 500w

Overview

Here's a chart illustrating the estimated backup time for various 12V battery sizes when using a 500W inverter.

Just plug it into your car's 12-Volt DC outlet or connect the clamps directly to your vehicle battery and power cell phones and tablet computers or recharge batteries from practically anywhere.

Use 12 volt 12 amp inverter 500w

[How to Accurately Calculate the Current Draw for a 500W Inverter](#)

To calculate current draw for a 500W inverter on a 12V system, use the formula: $\text{Current (A)} = \text{Power (W)} / \text{Voltage (V)}$. Thus, $\text{Current} = 500\text{W} / 12\text{V} = \text{approximately } 41.67\text{A}$...
