

# User Energy Storage Products

## Overview

---

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.

Why should you choose fluence energy storage?

Energy storage provides the agility and efficiency to keep pace with an evolving energy landscape. Unlock the full potential of your network with energy storage. Our products are designed for the most demanding industrial applications and have stood the test of time. Discover the Fluence energy storage product that's right for you.

How many energy storage units can be connected together?

Stackable and lightweight, installers can effortlessly connect up to four units together for additional energy storage. Available in three sizes including 9 kWh, 13.5 kWh, and 18 kWh to meet an installation company's growing customer energy demands. Operating modes: back-up mode, self-use mode, time-of-use mode and custom modes
