

# **Vaduz 1000vdc photovoltaic combiner box**

## Overview

---

Why should you choose a 1000v combiner box?

Our 1000V combiner boxes are equipped with true solar DC disconnect switches, DC fuse holders and type 2 surge arrestors to prevent over-voltage. Within a durable PC enclosure, we pre-assemble reliable DC components to reduce working time and error susceptibility, thereby improving the system operations of your end-users significantly.

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target application is fully met. Do you have any questions?
