

# Venezuela Home Solar Photovoltaic System

## Overview

---

Does Venezuela have a solar panel factory?

The engineer says: “It’s incredible, but in Venezuela, in the industrial region of Paraguaná, we have a solar panel factory, but it doesn’t have any staff. There’s materials in the storage facilities to produce for three years and supply the entire country with alternative systems.

Should Venezuela be filled with photovoltaic panels?

Venezuela should have been filled with photovoltaic panels a long time ago. But the electrical emergency is opening up a small path for this energy source, and the state hasn’t taken advantage of this technology yet.

Where is the first solar cell made in Venezuela?

In 2018, Venezuela announced the manufacture of its first solar cell: the development and research took about a year and was carried out at the facilities of the National Center for Optical Technologies (CNTO), attached to CIDA and located in the Libertador de Mérida municipality.

How did President Maduro promote the development of a solar industry?

The activity was financed by the National Fund for Science, Technology and Innovation (FONACIT). President Maduro expressed his desire to promote the development of a solar industry in 2013. Since then, however, only small, off-grid photovoltaic projects have been carried out, for isolated regions.
