

What are the photovoltaic power station energy storage projects in Luxembourg

Overview

Why is Enovos installing a photovoltaic power plant in Luxembourg?

Enovos is installing numerous photovoltaic power plants in the country in response to a call for tenders issued by the State. In addition to the rooftop installations that we are all familiar with, other types of technologies are being developed in Luxembourg.

How much money will a photovoltaic power plant project receive?

The projects will receive a total of approximately €16 million in financial aid. In the next 18 months, these companies will implement the photovoltaic power plant projects with at least partial self-consumption of the electricity produced. The combined capacity of these plants will be over 46-megawatt peak (MWp).

Does Enovos have a photovoltaic power plant?

Deployed over the last three years, Enovos currently has 30 MW of photovoltaic power plants in operation and 10 MW in planning in Luxembourg. Further development of photovoltaics in the Grand Duchy is essential to advance the decarbonisation of the energy sector. Your energy savings will be rewarded.
