

# **What is the price of a 1kW photovoltaic panel**

## Overview

---

What is the average price for a 1kW solar system in the United States?

In 2025, a 1kW solar system in the U.S. typically costs between \$2,500 and \$3,500 before any discounts, with prices averaging \$2.50 to \$3.50 per watt for home setups. This covers the panels and installation. How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much does a 1kW Solar System cost?

The surplus energy can be fed back into the grid, earning you a 20% return on your investment per year based on current electricity costs. The typical cost of a 1kW solar system is around \$2,000. However, it's important to note that the prices of solar panels have come down substantially over the past 10 years.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How many solar panels are in a 1kW solar kit?

Since the capacity is small, a 1 kw solar kit usually contains three solar panels. We offer monocrystalline modules from manufacturers from all over the world. Asian panels are the cheapest on the market. NA brands have higher prices but the quality is considered to be better.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.
