

# Where to use solar panels

## Overview

---

Once you've replaced all energy-consuming appliances with modern ones, you might find yourself with more energy than you initially needed. Here are some ideas how to make good use of it: 1. Use solar energy in the garden. For example, you can run an automatic sprinkler system on solar energy to keep your plants.

Normally, those who are connected to the commercial grid try to use their most energy-consuming appliances at night, when the electricity rate is the lowest. With solar panels you.

Since spring and summer days are longer and the sun is higher, solar panels get more sunlight and give off more energy. On average, a solar.

Solar panels provide you with a steady flow of electricity during the day, but usually you can't spend it all. Not all of us are home during the day, and we definitely don't use our devices all the time. This means that extra energy just goes to waste, while it could.

Making sure your panels are working properly doesn't mean climbing up the roof every few months. While manufacturers recommend performing a visual inspection of your solar array once a year, it's much easier to monitor its work via special devices: a charge.
